

ADIRONDACK REGIONAL BLOOD CENTER

Important Donor Update

New Electronic Donor Screening Process

Beginning September 14, the Adirondack Regional Blood Center will implement a new electronic donor screening process to improve the safety of the blood supply.

In compliance with Federal regulations, the donor health questionnaire will be no longer on paper. Donors will now answer health questions electronically on a provided laptop. The screening may take slightly longer especially as our team and donors learn the new system. All donor information will remain secure and will be protected in the same manner as CVPH patient information. Only individuals with access to this information will be members of our blood donor program.

To aid in speeding up the screening process, we will be simplifying the medication list and reducing the number of questions. In addition, we will provide a shorter questionnaire for all donors who have donated within a six month time period.

Thank You Donors

Thank you for continuing to support the Blood Center - and your North Country neighbors - through your donations. The blood we collect supplies CVPH and many other hospitals throughout the Adirondack Region. Your donation saves lives. Schedule an appointment today - we hope to see you soon.

If you are interested in donating, please call the Adirondack Regional Blood Center at (518) 562-7406 to schedule an appointment.
